Sewing School: Installing a Half Gusset

1. Using pins or Washaway Wonder Tape, place your half gusset with the long end toward the waist along the Back Rise and the shorter end closer to the inseam on the Back Rise. Sew just the gusset portion with a stretch stitch or a serger.

2. Place other leggings piece Right Side down on top of piece with the gusset already attached. Line up Back Rise and Half Gusset. Sew down the entire Back Rise with a stretch stitch or a serger.

3. Match Front Rises up and sew with a stretch stitch or serger.

4. Open Front Rise up and match crotch seam to the MIDDLE of Half Gusset on the back. Pin or tape in place, matching up inseams and pinning those as well.* Sew from hem to hem with a stretch stitch or serger.

***It's important to pin inseams and not just "grip it and rip it"! Pinning ensures that you don't end up pushing fabric with your sewing machine or serger and having a piece longer than the other at one end!**
